## **Oregon reports 536 new confirmed and presumptive COVID-19 cases, 5 new deaths**

**PORTLAND, Ore.** — There are five new COVID-19 related deaths in Oregon, raising the state's death toll to 2,154, the Oregon Health Authority reported at 12:01 a.m. today.

Oregon Health Authority reported 536 new confirmed and presumptive cases of COVID-19 as of 12:01 a.m. today, bringing the state total to 152,711.

### **Vaccinations in Oregon**

Today, OHA reported that 25,602 new doses of COVID-19 vaccinations were added to the state immunization registry. Of this total, 20,646 doses were administered on Feb. 19 and 4,956 were administered on previous days but were entered into the vaccine registry on Feb. 19.

Cumulative daily totals can take several days to finalize because providers have 72 hours to report doses administered and technical challenges have caused many providers to lag in their reporting. OHA has been providing technical support to vaccination sites to improve the timeliness of their data entry into the state's ALERT Immunization Information System (IIS).

Oregon has now administered a cumulative total of 781,202 first and second doses of COVID-19 vaccines. To date, 924,575 doses of vaccine have been delivered to sites across Oregon.

These data are preliminary and subject to change. OHA's [dashboards](#) provide regularly updated vaccination data, and Oregon's dashboard has been updated today.

Weather-related issues during the past week may cause changes to daily number trends reported by OHA in its updates on the cumulative number of doses administered, the daily number of administered doses and the number of doses delivered to Oregon. OHA remains in regular contact with the Centers for Disease Control and Prevention (CDC) for updates on delivery schedules and to ensure Oregon doses are safely delivered to Oregon vaccination sites. Doses scheduled for delivery this past week may ship out this weekend or early next week due to winter weather issues impacting shipments coming from Memphis, TN.
